What is ERM?

COSO Enterprise Risk Assessment – Integrating with Strategy and Performance (2017)

Enterprise Risk Assessment is *“the culture, capabilities, and practices, integrated with strategy-setting and performance, that organizations rely on to manage risk in creating, preserving, and realizing value.”*

Why Does ERM Matter?

- The current environment, characterized by increasing volatility and complexity, illustrates the critical importance of risk management for organizations of all types.
 - Organizations need to be flexible, adaptable and think strategically about how to maximize opportunity while also mitigating risk.
 - Risk management helps to accelerate growth, enhance performance and provides a competitive advantage.
 - Implementing enterprise risk management helps to create trust and instill confidence in stakeholders.

What is the Value of ERM?

Polling Question # 1

What is the Definition of Risk?

COSO Enterprise Risk Assessment – Integrating with Strategy and Performance (2017)

“Risk is the possibility that events will occur and affect the achievement of objectives”

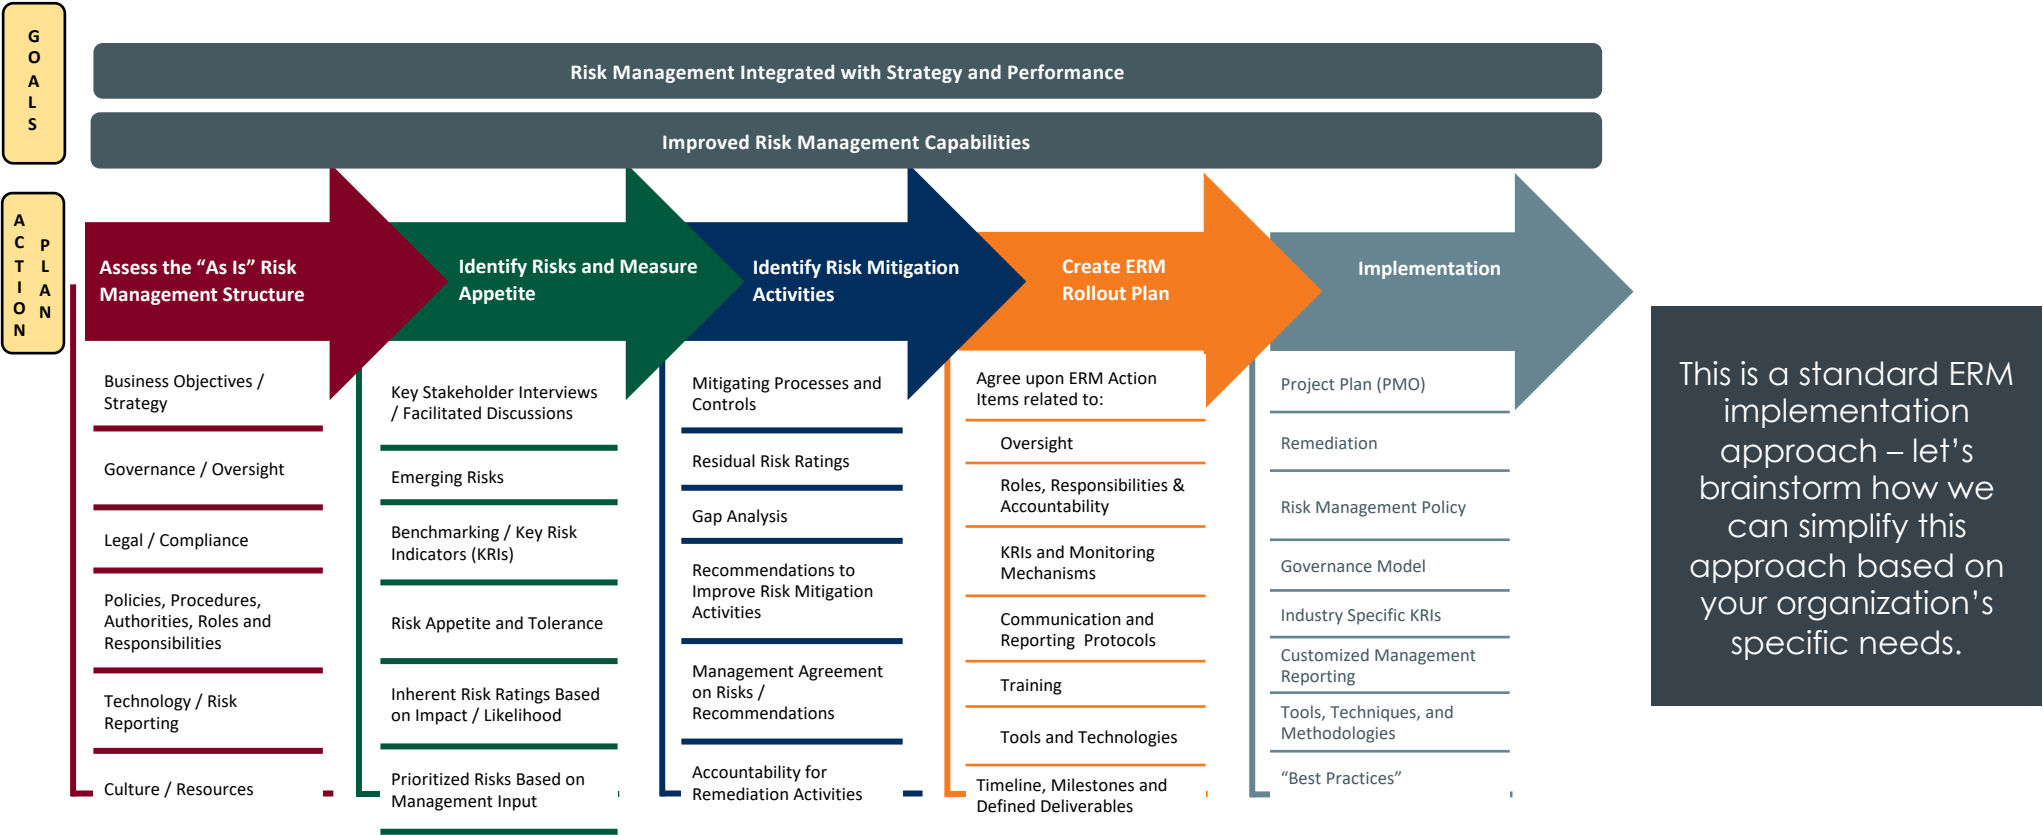

Common types of risk categories:

- Strategic
- Operational
- Environmental, Social and Governance
- Financial
- Economic
- Reputational
- Technology
- Compliance

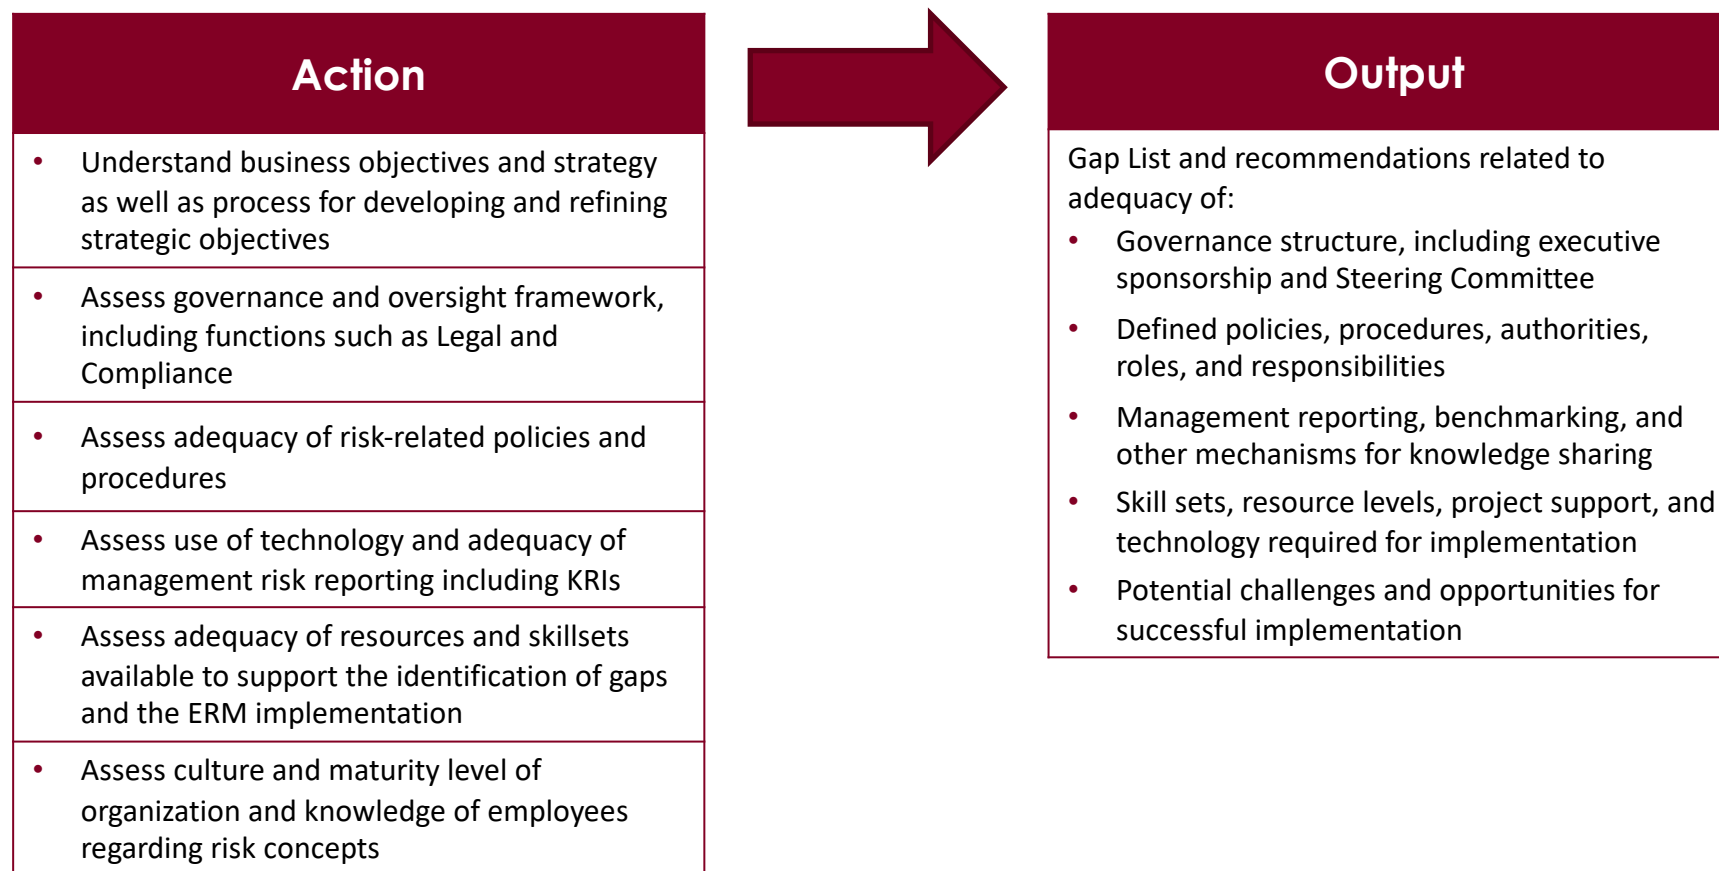

What are Some Risks to Consider?

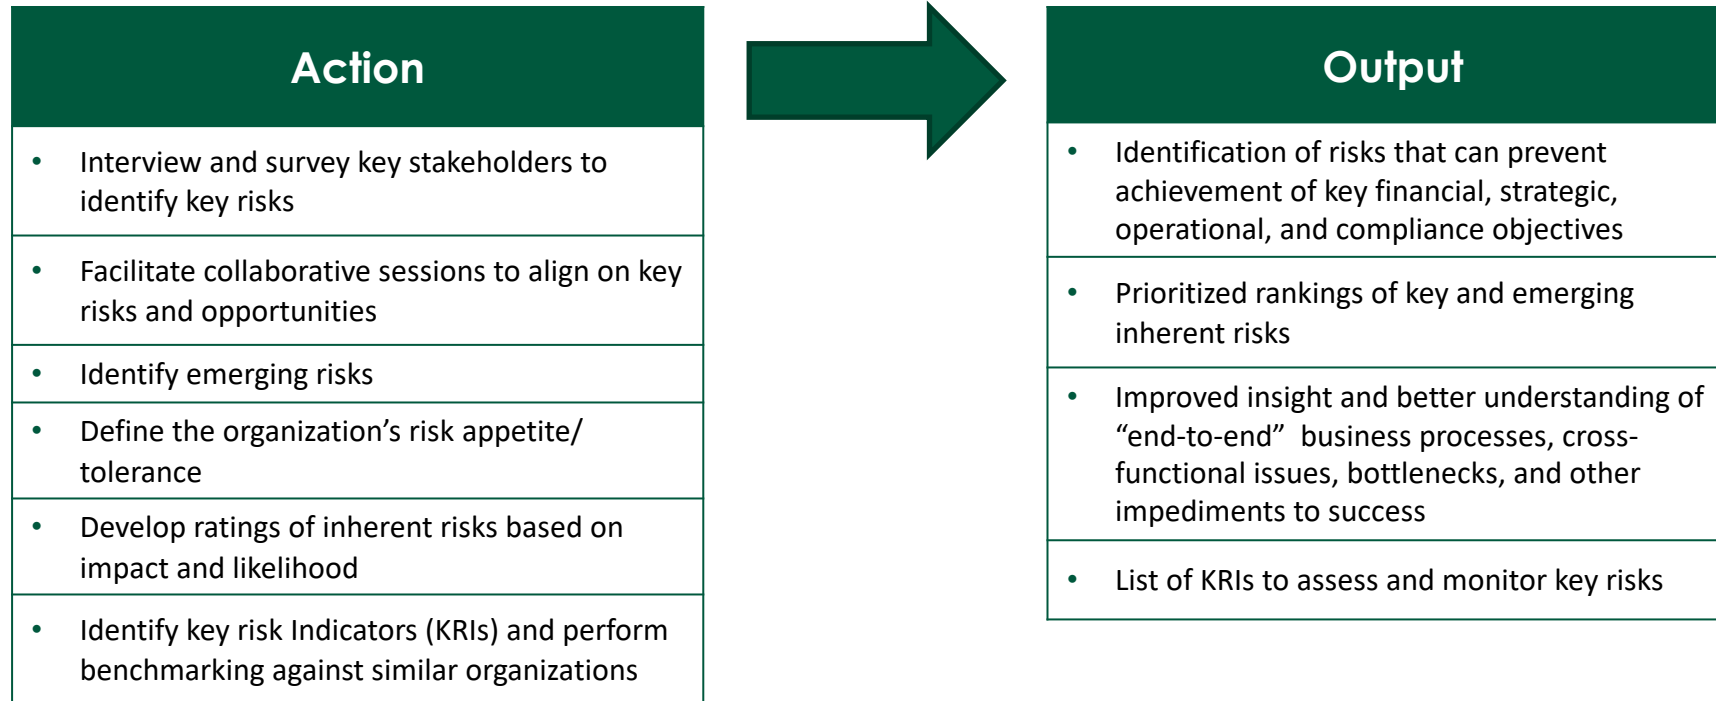

Is There a Simplified Approach to Implementing ERM?

Step 1: Assess the “As Is” Risk Management Structure

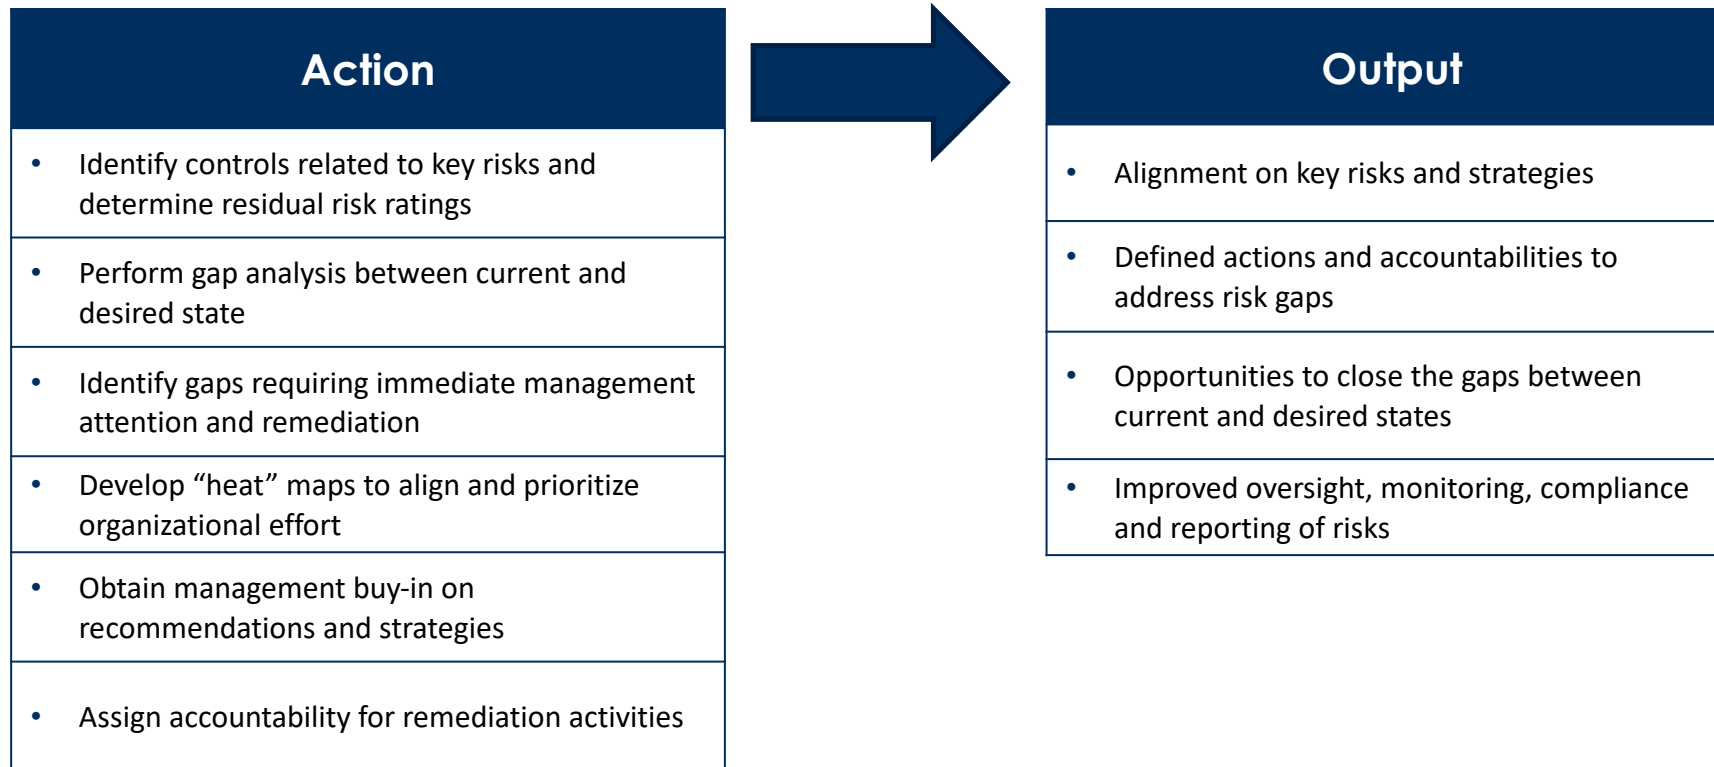

Step 2: Identify Risks and Measure Appetite

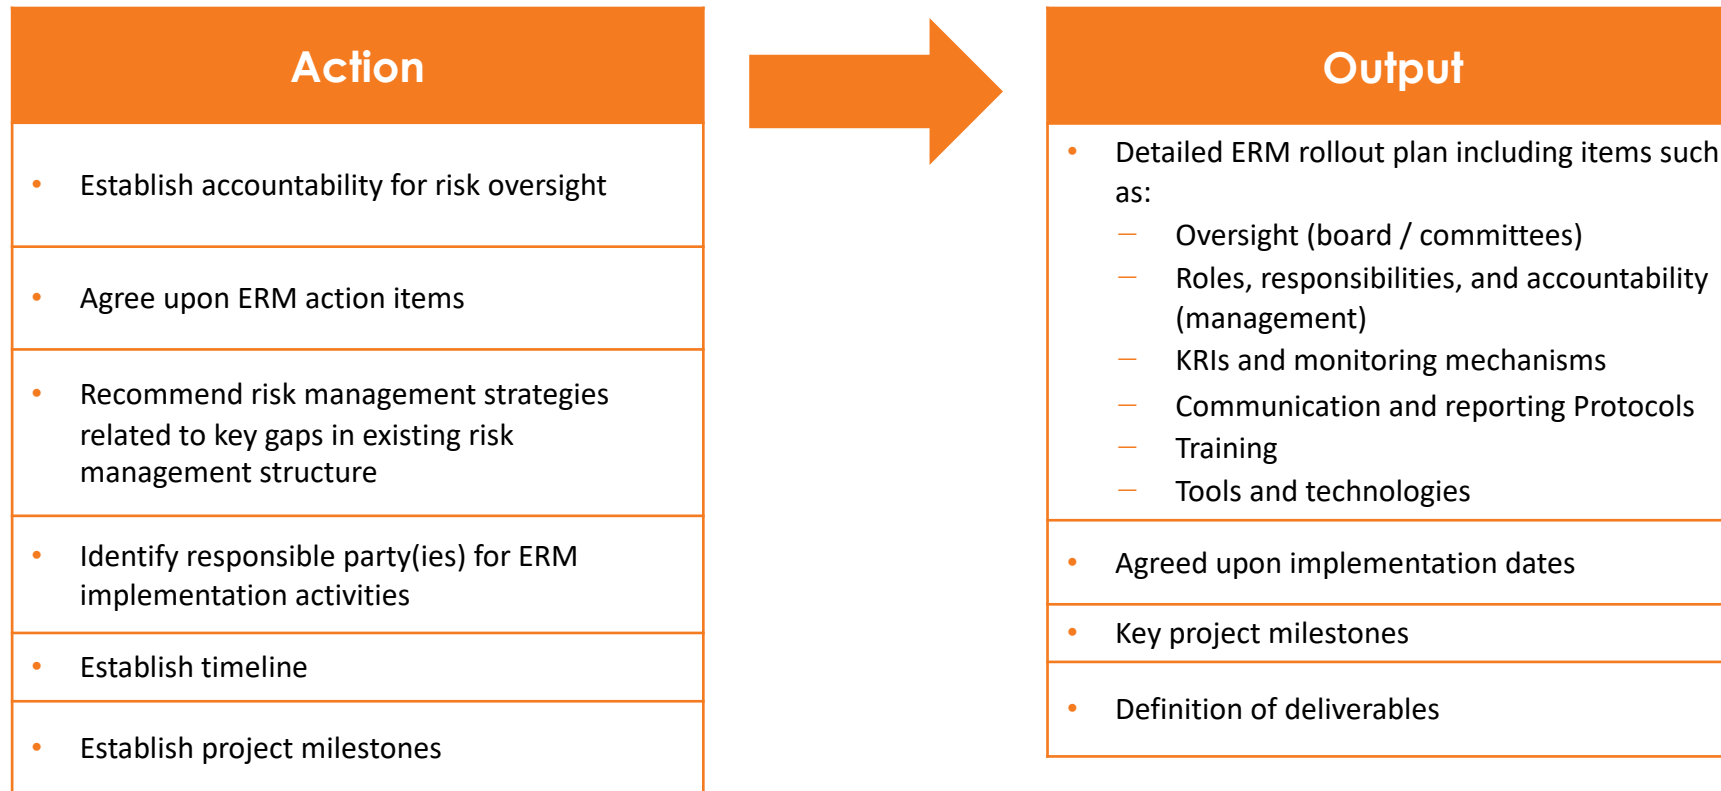

Polling Question # 2

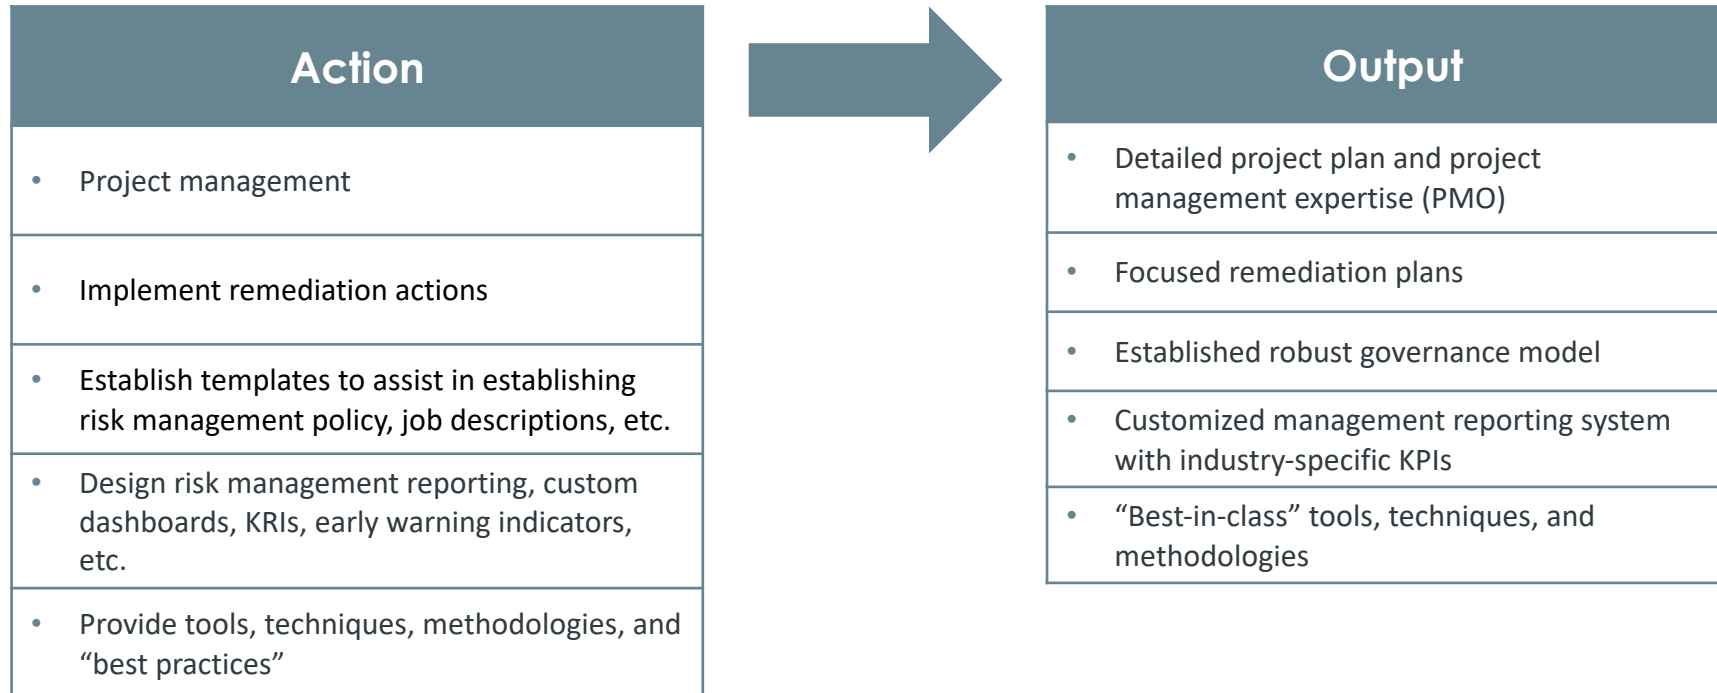

Step 3: Identify Risk Mitigation Strategies

Step 4: Create ERM Rollout Plan

Step 5: Implementation

How Do You Get Started?

- Some keys to successfully implementing ERM include:
 - Executive sponsorship and buy-in
 - Risk awareness culture
 - Input from all key stakeholders
 - Build and implement the program in smaller stages
 - Balance risk mitigation against cost requirements and resource availability
 - Prioritize implementation stage(s) and focus on most critical tasks first
 - Learn from others' experiences (both good and bad)
 - Develop realistic expectations of the time and effort necessary to develop a mature ERM process
- *Any other suggestions?*
